## STANDS FOR MUSIC - SINCE 1949

„Our philosophy is to manufacture high quality and durable products in an environmentally friendly manner, so that musicians worldwide can concentrate on what’s essential — their music.“

König & Meyer is a family-operated company that is socially and environmentally responsible, generates creative ideas, and deals fairly with its employees, customers and suppliers.

Established over 60 years ago in the music branch, our company stands for sophisticated equipment with excellent quality. Our products are distinguished by innovative design, functionality and durability.

As one of the world’s leading providers of music stands, microphone and instrument stands, speaker stands, seats and accessories for lighting, sound and studio technology, we constantly are challenged to develop innovative solutions for our customers’ needs and wishes.

About 270 employees in Wertheim, Germany work together to fulfill this promise constantly.

In accordance with our quality standards, almost all metal and plastic items are manufactured in in-house production. Over 1,500 stands and brackets are produced in our two plants in Germany and sold in 80 countries worldwide. Many of our products have already become classics as well as standards in the music industry.

Numerous patents and international trademark rights substantiate König & Meyer’s innovative spirit. The durability of our products also supports environmental considerations.

Gabriela König  
CEO

Heiko Wolz  
CTO

Martin König  
President

In 15,000 square meters 270 employees work in production and research on innovative equipment solutions

# THE ENVIRONMENT IS IMPORTANT TO US

„Resources are too valuable to waste. Whether we produce a music stand, a microphone stand or a speaker stand, resource conservation and environmental protection are firmly anchored in each step of our production.“

We prevent waste, save water and energy and reduce emissions wherever possible. We continually review all environmentally relevant processes and develop strategies and measures that can minimize resource consumption and environmental impact.

Environmental protection has been a stated corporate goal of König & Meyer for decades. Our unlimited commitment to quality and environment in the production process translates into the most effective use of raw materials, conservation of energy, greater use of renewable energies, recycling of parts and products at the end of their life, avoidance of pollutants in production, reduction of CO<sub>2</sub> emissions, reduction of water consumption and treatment of waste water used in the production process to produce potable quality. Since 1979 we have reduced our water consumption by 94 percent.

König & Meyer has been certified according to the recognized ISO 14001 standard since 2000 and the EU EMAS regulation since 1998. Both were awarded for effective and responsible

environmental protection.

We were also awarded the Environmental Prize of Baden-Württemberg for

our outstanding achievements in promoting environmental protection and for our environment-based management.

Use of renewable energy through our pellet heating

Continuous monitoring of our powder coating

Our solar system feeds 100 megawatt hours per year into the grid. This eliminates 65 tons of CO<sub>2</sub>

## PRECISION — MADE IN GERMANY

„Our total commitment to quality is reflected in our activities at all company levels. New achievements are merely the starting point for something better.“

This conviction motivates every individual at König & Meyer, shapes the culture and determines the processes in the company. It is expressed in an uncompromising focus on premium claims: Only a strong brand with a unique service and the best quality satisfies customers over the long term. Since 2007 our quality management is reviewed and certified annually according to the internationally applicable ISO 9001 quality norm.

From development and design to final production König & Meyer offers everything from a single source. In order to achieve durable and reliable quality of our products, we only use precision steel tubes, which are consistent in their dimensions and tolerances. Metal and plastic parts are manufactured in in-house production. For years, we have been developing and building tools and equipment ourselves.

Product responsibility begins with development. With our highly qualified staff, we operate independent research and development. The latest computer technology, short development times and the highest quality standards form the basis

for the innovations of tomorrow. The focus is always on benefits for user benefits, sustainability of products and consideration of resource and environmentally friendly production processes.

Through innovative technology, vertical range of manufacture and consistent re-investment in machinery König & Meyer achieves the flexibility to respond quickly and straightforwardly to customer needs and market requirements.

Since 2007 our quality management is reviewed and certified annually according to the internationally applicable ISO 9001 quality norm

## OUR SERVICE

„We know that our customers determine our success. Therefore, in all our actions we always place the customer at the center of attention.“

Besides an ability to deliver products with high quality and reliability we offer our customers additional services:

**Our products have a 5-year warranty.**

**We offer a 10-year replacement service for all of products in our catalog.**

With these service benefits, we make a difference for the König & Meyer brand and want to make it even easier for our customers to choose our music accessories.

If you have any questions or concerns we welcome your contacting us personally:

You can obtain further information about König & Meyer on Facebook, Twitter and YouTube, as well as [www.km.de](http://www.km.de).

## MUSIC STANDS

König & Meyer music stands are virtually unsurpassed in quality the world over. All elements of the stands' construction are precisely calibrated to ensure perfect interplay. Meticulously selected materials guarantee carefree setup and breakdown – and of course a sturdy stand – year after year.

Thanks to the variety of styles and sizes of music stands that König & Meyer has to offer, everyone – from the budding music pupil to the professional musician – can find the perfect stand for his or her individual needs.

black 10810-000-55

The most impressive stand in its class. This extremely stable design of stand has a sheet music desk of 500 x 240 mm – for size plus grandeur. The three-piece folding music stand has easy-to-use clamping elements. Its large music desk (with integrated name plate) has plenty of room for heavy folders and is an alternative to a music stand with a plate.

-------	--------------

This unique music stand light features excellent lighting properties. Thanks to the CCFL lamp it produces a very pleasant, bright and richly contrasting light. A DIN A3 page can easily be lit. The lamp has a life expectancy of approx. 20,000 working hours, uses very little electricity and produces impressively little heat. The light can be run on batteries if there is no mains connection available. There is room for up to 9 AA 1.5 V batteries in the lampshade. The flexible goose neck allows optimal positioning. The light can be attached to all standard music stands or panels up to a thickness of 20 mm.

The useful »Mighty Bright Duet 2« light is the ideal light to take on tour or to use at home. Its flexible goosenecks mean it can easily be adjusted to suit individual needs. Long-life LEDs easily light a 2 x A4-sized surface. A practical attachment clip allows it to be used on music stands or as a standing light. Four bright light diodes to switch on individually are powered optionally by re-chargeable batteries or by a power supply unit.

## STANDS AND ACCESSORIES FOR INSTRUMENTS

From all-round guitar stands to stands for rare musical instruments, König & Meyer offers a wide range of professional instrument stands.

Continually tested, tweaked and refined, many of these stands have set the standard for functionality and workmanship for many years.

Behind every innovation there is 60 years of experience and expertise – expertise that allows us to develop instrument stands that precisely and compactly guarantee the very best footing for your instrument.

black 17604-000-55

Have you ever inadvertently left your guitar on top of a cable or jack plug? It simply cannot happen with this unique four guitar stand.

Thanks to the moveable hanger and easy height adjustment, up to 4 acoustic, electric and bass guitars are always easy to hand and ready for playing. Even unusually shaped guitars can be stored safely. Large soft foam rolls protect the guitars from inadvertent knocks or bumps. The "fit-for-tour" steel tube construction is stable and durable. The base legs can be folded with little effort into a compact and flat package for transport.

black	17515-000-55

Ideal for use in the studio, on stage in a shop or at home. No matter whether you have acoustic, electrical or bass guitars, the special instrument-compatible supports protectively hold max. 5 guitars. The protective bars stop the guitars from rotating and prevent inadvertent removal or knocks or bumps when taking the guitars from the stand or placing them. Highly flexible, sub-divided support arms with integrated pick holders mean the guitar can be held from either side (right or left) and that the strings are untouched. The »Guardian« is available entirely in black or with translucent support elements, which excludes potential discolouration of valuable guitars with nitrocellulose paints.

**THREE GUITAR STAND**  
**»GUARDIAN 3«**

**NEW**

**17513**

Weight	3.6 kg

## GUITAR CAPO

### 14530

Weight	0.06 kg
Special features	ergonomic design; no „string bend“ - tuning is not affected; unique clamping mechanism, easy to operate
Material	zinc die-cast frame
Instrument support	non-marring plastic material
Finger board	flat
Clamping	one-step push and release system
Clamping range	20 to 30 mm
Dimensions	72 x 14 x 65 mm

#### Order No.

mat chrome 14530-000-06

This appealing, ergonomically designed and easy-to-use professional capo is for nearly all six and twelve string guitars with flat or slightly curved fingerboards. A long product life is a given for this robust zinc die-cast model with high-quality craftsmanship. The parallel clamping mechanism permits precise contact pressure and adjustment plus a quick release.

black 15213-000-55

Thanks to its patented 5 leg base, the 15213 has achieved world-wide recognition. It features an extremely stable leg construction and space-saving transport method in the bell of the trumpet. Its solid zinc die-cast legs screw into the base. Felt pads and the rubber-covered peg top protect the instrument from scratches.

## DRUMMER'S THRONES, BENCHES & STOOLS

A perfect drummer's throne and the proper posture it promotes is one of the most important requirements for a drummer.

Long testing phases and intensive collaboration with professional drummers like Mike "Gomezz" Gommeringer, Toni Liota and Sven "Ice" Ehrhardt have helped us to design our latest drummer's throne models to withstand the most stringent demands. Ergonomically perfect seats and an ingenious, finely-calibrated adjustability make the musician feel right at home on a König & Meyer drummer's throne.

Thanks to the usual high-quality workmanship and extensibility, König & Meyer keyboard benches and stools have long been classics among our customers.

## KEYBOARD STANDS

From experience, we know that among musicians, keyboardists often subject their stands to the most rigorous treatment.

When developing new stands for keyboard instruments, König & Meyer engineers and designers therefore pay extra special attention to the sometimes enormous weight of the instruments, the overview of the instrument needed while playing and the equally important ergonomic comfort of the keyboardist's "workplace". With painstaking attention to detail, König & Meyer imbue their keyboard stands with individualised adjustability, compactness for optimal transportability, and above all, reliability – gig after gig.

**KEYBOARD STAND**

black 18810-000-55

Its compact steel tubing construction and large round floor protectors make this attractive keyboard table significantly more stable. Two sided spring-loaded locking screws make precision height adjustment easy. The support arms can be adjusted to suit the size of the keyboard. When folded, the table is impressively flat. The design of the table complements keyboard bench 14085 or 14086.

black

28130-011-55

The new amp stand can hold monitors, amps or other equipment to a max. weight of 35 kg without a problem. The angled front legs have significantly improved the stand's stability and strength. The low centre of gravity ensures even larger amps are securely displayed. The fine adjustment on the supporting leg allows a tilt between 15° and 28°. A microphone can be attached to the telescopic tube using a boom arm with a thread of either 3/8" or 5/8". Folds compactly.

## MICROPHONE STANDS

We're especially proud of these: König & Meyer microphone stands have boasted an outstanding reputation worldwide for decades. There is hardly a music studio, concert or event that isn't outfitted with König & Meyer microphone stands.

What convinces the musicians?

The solid, tough clamp elements and mechanics, or the choice of materials and the quality of the finish? We think it's the sum of all the parts of a stand that is made with precision and a love for detail.

*All microphone stands are also available in 5/8" thread*

**MICROPHONE STAND**

gray 21080-300-87

The attractive basalt gray powder coating gives the microphone stand an extravagant accent and reduces light reflection to a minimum.

This stand is perfect for professional use on the public stage. Further features include the easy-to-grip »Soft-Touch« clutch with an elastic plastic cover and a boom arm with user-friendly wing nut adjustment.

The exclusive microphone stand

**MICROPHONE STAND**

25600	STARLINE
Weight	3.4 kg
Special features	zinc die-cast base; no parts to lose; clamping lever can be used for cable management
Material	steel
Leg construction	socket with foldable legs
Threaded connector	3/8"
Height adjustment	clutch
Rod combination	2-piece folding design
Boom arm	2-piece telescopic design
Boom arm clamping	heavy-duty all metal clamping lever

Goose neck diameter	8 mm
Goose neck length	330 mm

**Order No.**

black 23966-000-55

This high-quality popkiller is an essential piece of equipment for every professional recording studio. The large nylon screen is a perfect filter for troublesome buzzing and popping sounds. In addition it is better protection than a metal screen against moisture. The stable gooseneck can be mounted on all standard microphone stands and is suitable for many types of performance.

## SPEAKER, LIGHTING AND MONITOR STANDS

König & Meyer speaker, lighting and monitor stands set the standard in their class.

Reliability, stability and solidity are particularly important in this area: Nothing less than the safety of the musicians and the audience is at stake.

Intensive research into appropriate materials from among the highest-quality plastics available and the construction of highly durable connecting parts are just some of the individual steps in a long development process.

Our latest models from the "Ring Lock" series also prove that König & Meyer speaker stands aren't just exceptionally reliable, but also provide a big plus when it comes to practicality and handiness.

**SPEAKER STAND**

21435	BASELINE
Weight	5.5 kg
Special features	patented gradual height adjustment system; integrated shock absorber; mounting aid included
Material	steel
Number of legs	3 pieces
Leg construction	tube legs with cross braces
Height adjustment	locking screw with push-button system
Max. load capacity	50 kg
Tube end(s)	diameter 35 mm
Rod combination	2-piece folding design
Height	from 1,320 to 2,020 mm

**Order No.**

black 21435-009-55

The standard speaker stand constructed from steel tubing has been significantly improved. The new legs with a tubing diameter of 35 mm and the large, fixed foot end caps guarantee stability and safety. Lasered bore holes and durable, robust plastic saddle washers improve the coefficient of friction between the legs and braces and prevent scratching of the finish. A compact clamp with a patented push-button system affords user-friendly stand height adjustment. The locking screw provides additional stability and vibration-free speaker mount. Additional features include a pull-out guard for the extension tube, the mounting aid and an integral anti-shock component.

The world-wide acclaimed speaker stand has been upgraded. All clamps are now high quality zinc die-cast. The new leg construction and large fixed foot end caps enhance safety and stability even further. This professional stand is TÜV (German Technical Supervisory Agency) approved for a maximum central load capacity of 50 kg. Other features such as the pull-out guard for the extension tube, the integral anti-shock component and comfortable height adjustment with spring-loaded bolt and locking screw have of course been retained. Comes with a mounting aid on the extension rod.

## MULTIMEDIA EQUIPMENT

The growing market for multimedia products has in turn sparked a steadily climbing demand for holders and stands for diverse purposes.

For example, monitors of all shapes and sizes need to be mounted on shop ceilings, on the walls of trade fair stands, or presented on stands in entrances.

König & Meyer offers flexible holders and stands for nearly every purpose in unmistakable designs and the usual high-quality workmanship.

Showtime! The clever way to display your iPad. The new connector holds an iPad securely and comfortably. Whether on stage, in the rehearsal room or at home – the strong prismatic element with its ergonomic clamping screw allows the iPad holder to be attached quickly and easily to any tubes from 7 to 30 mm diameter. The iPad is snapped in or out of into holder effortlessly. The pivoting range is second to none, allowing the user the iPad position of their choice. The swivel movement can be adjusted from free to resistant. Naturally, the iPad can be rapidly switched between a vertical and horizontal format. The adjustment is easy and slip prevented.

iPad is a trademark of Apple Inc.

## SHOP FITTINGS

The brand-compatible presentation of products in a shop is playing an increasingly important role in the buying decision process.

Clear and visually appealing, the large selection of König & Meyer instrument holders in combination with the professional SPACEWALL shop fitting system are a perfect solution for your business.

The flexible SPACEWALL wall panels can be installed in practically any texture or colour you desire in any shop. They will show off your merchandise perfectly, whether you have a small showroom or a huge megastore.

**SPACEWALL®****44000****Order No.**

44000-000-00

The SPACEWALL® shop-fitting system can be individually implemented in already existing shops or in complete new stores. You can choose for example from following surface finishes for your slatwall: unfinished or paint finished surface or a painted wall according to your desired RAL/NCS color. You also have the choice between a melamine resin coated surface in the colors white, grey, ivory or cream-white or a plastic-laminated slatwall in either white E110 MP or grey E 6 MP. Further possibilities are metallic or acrylic mirror designs or wood veneer finishes like pine, spruce, maple or alder. Further finish variations on request. We offer you the following slat widths: 53.1 mm, 76.3 mm, 88.0 mm\*, 101.8 mm, 152.6 mm, 203.5 mm, 244.2 mm, 305.3 mm. Head pieces and bases can be produced on request. Ask for special design variations and other sizes for your slatwall!\* Size 2430 mm x 1210 mm or 1210 mm x 2430 mm.
