## Lehmannaudio

## Hide your valuables

No matter whether you just want to avoid visitors seeing your installed High End audio gear or whether you simply have a preference for looking at neat and clean furniture. A **Black Cube mounting kit** will help.

Having a clean desktop is always an easy task when both the **Black Cube Linear USB** preamp and the **Black Cube Stamp** audiophile power amp are mounted accurately side by side like in the picture on the left. Passive high quality speakers can be placed on the table giving you a nearly unlimited choice of models instead of having to use those cheesy little plastic "multimedia speakers" from the local PC discounter. Why not have fun and superior sound even at work? Enhance your desktop listening pleasure now!

This wooden chest of drawers on the left side does not seem to hide anything. Placed in a bedroom noone would have an idea of looking for the **Black Cube Stamp** audiophile stereo amplifier underneath. The **Black Cube mounting kit** provides maximum functionality with discreet concealment in places where a homelike atmosphere shall be preserved.
